

Dr. Cheryl Jacobs is the Assistant Director for Genomics and Data Access at the NIH Office of Science Policy. She received her doctoral training in Human Genetics from the University of Michigan and continued training as a postdoctoral fellow at the National Cancer Institute investigating the molecular epidemiology of prostate cancer disparities. Dr. Jacobs has over 10 years' experience working on and leading evidence-based policies to support the broad and responsible sharing of controlled-access data. She brings extensive knowledge of research participant protections, privacy, and security.
