

Dr. Elizabeth M. Clerkin is a Data Science and Sharing Specialist in the Office of Data Science and Sharing at NIH's *Eunice Kennedy Shriver* National Institute of Child Health and Human Development (NICHD). She works closely with colleagues across the Institute to support responsible and effective sharing and use of research data, including efforts to support data governance, guide implementation of the NIH Data Management and Sharing Policy, and contribute to the development of a federated NICHD Data Ecosystem. She holds a Ph.D. in Developmental Psychology from Indiana University and brings a combined background in developmental science, data science, and data stewardship to her role.
