

JaWanna Henry is a Branch Chief/Supervisory Health Information Program Analyst with the U.S. Department of Health and Human Services, Office of the National Coordinator for Health Information Technology (ONC). She leads the implementation of the Trusted Exchange Framework and Common Agreement (TEFCA), advancing secure, nationwide health information exchange and interoperability. In this role, she oversees collaboration with the TEFCA Recognized Coordinating Entity, directs program operations, manages strategic investments, and leads cross-functional teams responsible for implementing the Common Agreement and related technical frameworks.

Ms. Henry has served in several leadership roles at ONC, where she has managed national initiatives to advance health information exchange, interoperability standards, EHR integration, and clinical decision support. She has led multidisciplinary teams and collaborated with federal agencies, healthcare organizations, standards development organizations, and industry partners to improve the exchange and use of health information.
